

Stainless Steel Mechanical Seal Centrifugal Pumps Massive – Durable – Safe

ZMP

Mechanical seal chemical process grinder pump

Designed to:
DIN EN ISO 5199

Compliant with:
EC Machinery Directives
EC ATEX Directive

Rotor in the ZMP - 3-In-One (crushing, mixing, pumping) mechanical seal chemical process pump

CP Pump Systems

Energy Efficiency in Industry

Our company

CP is a highly innovative Swiss company with a rich tradition. Since 1948, we have specialised in developing and manufacturing premium quality high-tech products and providing services for international customers with the most rigorous requirements.

We produce reliable and innovative centrifugal pumps for the chemical, pharmaceutical, biotechnology, food and beverage, and pulp and paper industries. Through our network of representatives in more than 70 countries, we offer first-class advice and ensure efficient customer service locally, around the world.

Reflecting our deep commitment to energy efficient products and services, we deliver environmentally friendly solutions that always go hand in hand with maximum safety and economy. As a pioneer in this area, we advise and assist customers with a wide range of needs – throughout the value chain.

CP operates a quality management system certified to ISO 9001.

Energy efficiency in industry

Nowadays, industry is facing increasing demands to improve sustainability and energy efficiency. Pumps are considered to play a key role since two thirds of the energy used in industry is consumed by motor systems. As pumping systems account for around one quarter of this consumption, they offer vast potential to save energy and costs. Already recognising this back in 1999, CP acted accordingly and has become a pioneer in energy-saving pumping equipment.

In recent years, we have continuously enhanced the hydraulic performance of numerous pump systems, increasing their efficiency by up to 30 per cent. At the same time, we have steadily improved pump safety, a mission we have vigorously pursued ever since our company was established in 1948.

We are wholeheartedly committed to promoting sustainable manufacturing in industry around the world: with energy efficient systems and in-depth expertise in all facets and phases of an industrial pumping facility – from planning through production and operation to quality assurance. Our customers benefit from a comprehensive range of bespoke solutions that reduce costs and CO₂ emissions over the long term.

Cleaner pumps, cleaner planet: we firmly believe that sustainable research, thinking and action always pay off for everyone.

ZMP – 3-In-One (Crushing, Mixing, Pumping) Stainless Steel Mechanical Seal Chemical Process Crushing Pump

The ZMP crushing pump is ideal to meet the stringent requirements of chemical processing and a multitude of other industries. This highly advanced pump is built for reliability and absolute safety in handling a huge variety of fluids with a high solids content.

Capable of far more than an ordinary feed pump, the ZMP crushes, mixes and pumps multi-phase media simultaneously. The core of the ZMP is the rotor mounted at an oblique angle on the shaft. When the pump is running, the angled rotor creates a tumbling motion that accelerates the medium in both an axial and radial direction, thoroughly mixing the material being pumped. Rotation of the rotor simultaneously generates a centrifugal force that pumps the medium radially through the casing liner and finally discharges it through the outlet.

Teeth on the rotor and casing liner reduce the solids in the medium to a defined maximum particle size. Slots and holes allow both coarse suspensions to be pumped and soft particles to be broken up. Customised casing liners are available to reduce solids to the required size.

Frame-mounted ZMP
-20°C to +180°C

ZMP with baseplate and motor
horizontal frame-mounted (-20°C to +180°C)

Technical data

Capacities (min./max.)	0.5 to 220 m ³ /h 2.2 to 968.6 gpm
Heads (min./max.)	2 to 14 m 6.6 to 45.9 ft
Temperatures (min./max.)	-20°C to +180°C -4 to +356°F
Kinematic viscosities	0.5 to 1000 mm ² /s 0.5 to 1000 cSt
Solids handling	highly suitable

Directives

EC Machinery Directive
EC ATEX Directive

Standards

DIN EN ISO 5199

Applications

Versatile – Complex – Special

CP's ZMP grinder pump is engineered to meet the most stringent quality standards and ensure reliability and utmost safety in production operations. Suitable for many different fluids in a variety of industries and processes, it is capable of handling low, medium and high flow volumes. Our ZMP offers tremendous advantages, especially in pumping very sensitive or hazardous substances.

Industries

- Chemical processing: basic and fine chemicals (agrochemicals, speciality chemicals)
- Pharmaceuticals
- Petrochemicals
- Biotechnology processing
- Food and beverages

Processes

CP's ZMP crushing pump is designed for a wide range of processes, including:

- Carbide sludge treatment
- Granule crushing
- Recycling
- Slaughterhouse residue processing

Fluids

CP's ZMP grinder pump is designed for handling multiphase media.

For example:

- Adhesives
- Bitumen
- Carbide sludge
- Granulated plastics
- Pigments
- Sewage sludge

Our sales staff will be glad to give you personalised advice tailored to your specific needs, industry, processes and fluids.

Slotted casing liner of the ZMP mechanical seal chemical process crushing pump

Perforated casing liner of the ZMP mechanical seal chemical process crushing pump

Options

Comprehensive – Individual – Combinable

Casing

Materials

- Stainless steel
- Nickel-base alloys, e.g. Hastelloy® B and C
- Titanium

Pressure rating

- PN 16 *

Connection flanges

- Flange to EN 1092-1
- Flange drilled to ANSI/ASME B16.5

Additional connections

- Casing drain (with or without flange)
- Manometer connection on the casing
- Mechanical seal housing drain/vent

Gasket materials

- PTFE-enveloped
- Gylon® blue

Plug seal material

- PTFE

Plug seal material

- Casing liner with holes
- Casing liner with slots

Mechanical seal

Standard double mechanical seal

Standard single mechanical seal

Gland packing

Double mechanical seal barrier/buffer fluid vessel

Vessel

- Cooling coil, manometer, thermometer and sight glass
- Total volume from 3 to 12 l (depending on vessel type)
- Hand refill pump (depending on vessel type)

Vessel connections

- Stainless steel braided PTFE hose
- Stainless steel piping

Bracket

- Steel
- Stainless steel

* Maximum, varies depending on the pump size.

Pump protection

Barrier/buffer fluid monitoring

- Level switch
- Pressure switch
- Temperature probe

Motor load sensor

Mount

Type

- Baseplate

Materials

- Steel
- Stainless steel

Stilts

Drive belt

Bearing frame

Lubrication

- Grease lubrication

Safety coupling

Sectional View of 3-In-One (Crushing, Mixing, Pumping) Stainless Steel Mechanical Seal Chemical Process Crushing Pump

ZMP

horizontal frame-mounted (-20°C to +180°C)

- A** Crushing
- B** Mixing
- C** Pumping

- | | |
|--------------------------------|------------------------------------|
| 1 Pump casing | 5 Seal faces (on atmospheric side) |
| 2 Casing liner | 6 Pump shaft |
| 3 Rotor | 7 Grease-lubricated bearing frame |
| 4 Seal faces (on product side) | 8 Bearing bracket lantern |

CP Pump Systems

Our Product Portfolio

Customer service

We offer the highest quality, many years of experience and first-class advice from a single source. Our bespoke pump systems meet a wide range of different requirements.

CP's customers benefit from a full service offering: the fastest availability of genuine spare parts, a complete set of technical documentation, competent and efficient customer support, and a dynamic and flexible repair service. All these services ensure that your pumps will operate faultlessly. Having representatives in more than 40 countries, we can provide local advice and support directly to our customers where required.

Energy efficiency consulting

As a trend scout specialised in energy efficiency, CP can deliver a wide spectrum of services relating to pumps and motors: comprehensive advice, in-depth system analysis, meticulous planning and design. Our goal is to actively help our customers optimise the energy consumption of their pumping systems and thereby cut costs over the long term.

Backed by our many years of broad experience, we today advise and assist customers in both the private and public sectors. These include owners and operators of fluid processing plants in the chemical, pharmaceutical and diverse other industries.

Are you interested? Do you have any questions? We would be happy to discuss all the different options with you personally.

Stainless steel magnetic drive centrifugal pumps

MKP
