

Decontamination declaration for repairs

Pump repairs, conversions and components

The **decontamination declaration** must be **completed in full** and supplied with the pump or pump component (e.g. impeller unit, bearing, etc.) to be repaired. A copy must also be sent together with the registration form.

Pumps or pump components delivered without a decontamination declaration will not be opened by CP staff. Inspection or repair will not be started! A **safety data sheet (SDS)** for the pumped last process fluid must be enclosed with every pump or pump component delivered.

There must be no residual liquid in the pump. **The pump components must be free of all liquids. This also applies to the bearing frame, mechanical seal and heating chamber!**

The pump drain plug must be removed to ensure complete drainage and proper flushing! This also applies to the drain plug on the lantern. See the file "Preparation for Transport Repairs" on our website! These must be enclosed with the delivered pump (not reassembled, but attached to the pump).

If the pump is not completely drained and flushed and the safety data sheet mentions a hazardous pumped liquid, the pump or pump component will be professionally cleaned by an external service provider at the customer's expense.

Pump type (see pump name tag, e.g. MKP 20-15-160)

Manufacturing/ serial number (see pump name tag, e.g. 24S0004545-201)

Last **operating medium** (supply/send safety data sheet (SDS))

Flushing medium

Security questions

Yes

Is the pump (including bearing frame, mechanical seal, heating chamber) **completely drained?**

Has the pump **drain plug** been **removed?** (Please supply separately)

Has the **drain plug** been **removed** from the lantern? (Please supply separately)

Is the **safety data sheet** for the **operating medium** supplied/sent?

Has the pump been flushed and cleaned and is it **free of hazardous substances?**

Are any residual quantities in the pump hazardous to humans and the environment?
If 'Yes': What immediate measures are necessary?

We confirm that we have completed this declaration truthfully and to the best of our knowledge. We acknowledge that we are liable for any damage caused by unmarked contamination of the returned item!
